SPECIFIC POLYMERS

Innovation in Polymer Chemistry

SPECIFIC POLYMERS (www.specificpolymers.fr, 2003, Montpellier, FRANCE) is a SME with 12 employees acting as R&D service provider and scale up producer in the field of functional monomers & polymers with high specificity. The company was created to meet the need of international high tech industrial groups in terms of specifically designed monomers, oligomers and polymers. **The main goal of the innovative product developed by SPECIFIC POLYMERS is to validate proof of concepts.** In other words, SPECIFIC POLYMERS propose R&D services for academic laboratories and R&D departments of high tech industrial groups.

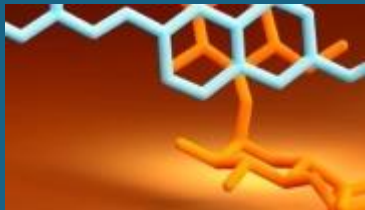

SPECIFIC POLYMERS ACTIVITIES

RESEARCH AND DEVELOPMENT Programs - innovation in polymer chemistry
ON-DEMAND SYNTHESIS of building-block, monomers and polymers
CATALOG PRODUCTS supplier (more than 1000 molecules)
UP-SCALED PRODUCTION from grams to kilogram
ANALYTICAL SERVICES - Physico-chemical characterization

GENERAL DESCRIPTION

SPECIFIC POLYMERS is approved "Crédit Impôt Recherche"

Research Programs

Within Research Program Services, SPECIFIC POLYMERS bring its expertise in Functional building-blocks, monomers, polymers and material synthesis for R&D services of companies or academic institutes.

Research Programs are medium to long term collaboration (6-12 months) in which various innovative solutions can be explore in order to solve out one or several problematics.

Custom Synthesis

SPECIFIC POLYMERS proposes for academic laboratories and R&D departments of high tech industrial groups Custom Synthesis Programs. Most of the time, this service is proposed to answer two kind of customer request:

Reproduction/Up-scaling of known synthetic pathway from described protocol (scientific article / patent).

Functional (Macro)Molecules Design in regards to defined specifications.

Catalog Produits

In almost 15 years, SPECIFIC POLYMERS developed the synthesis of more than 10 000 functional building blocks, monomers and polymers and is now working with more than 500 customers and partners in more than 35 countries worldwide.

Thanks to its Research and Innovation activity, SPECIFIC POLYMERS can propose to its customers a Catalog of more the 1000 (macro)molecules. Most of them (Around 800) are unique to SPECIFC POLYMERS.
