

PRODUCT IDENTIFICATION

| Description |
|---|
| PEO 7 Triethoxysilane is a polyethylene glycol with a triethoxysilane function. |

| Reference | Designation | CAS Number |
|-------------|-----------------------|-------------|
| SP-1P-2-003 | PEO 7 Triethoxysilane | 623933-36-8 |

THEORETICAL PHYSICAL / CHEMICAL PROPERTIES

| | |
|---------------------------------|------------------------------|
| Physical Aspect | Viscous liquid |
| Molecular Weight (g/mol) | 544,75 |
| Triethoxysilane content | 0,184 mol / 100 g of product |

| | |
|---------------------------|----------------|
| Boiling Point (°C) | 529 (± 50) |
| Solvents | Water, Acetone |
